

PI3000

PASSENGER INFORMATION SYSTEM

PI3000

PASSENGER INFORMATION SYSTEM

Powerful Passenger Information System

PI3000 is a powerful and flexible PC based presentation system that provides passengers with voyage progress and general information over the vessels existing TV system. In addition, safety messages, product advertising and promotions can also be shown so that a real return on investment can be attained.

PI3000 utilises easy-to-use “slide show” technology where slides can be created which include chart and position display, video, text, vessel data, video camera or image panels, all configurable in size and content. Once installed and set up PI3000 will run unattended.

To make your presentations even more stunning PI3000 comes with a complete world set of atlas style relief charts.

PI3000 is designed to run on a standard Windows PC interfaced with the vessel's existing TV systems.

This is what installing PI3000 can do for you:

Generate Revenue

Use PI3000 to keep your guests up to date with your latest promotions and make sure they don't miss out on events and excursions. PI3000 will tirelessly present opportunities to your guests.

- **Slides can be updates on-the-fly to show up to the minute information**
- **Show latest promotions using the ticker tape feature**
- **Advise guests of products on offer and where to buy**
- **Run presentations on available excursions and events**
- **Show advertisements and product promotions**

Enhance Your Customers Experience

Give your customers the best cruise experience. With PI3000 you can keep guests entertained and informed via the on board TV system.

- **Show vessel's real-time position on digital charts**
- **Show planned routes, voyage progress and ETAs**
- **Remind guests of daily events**
- **Provide weather information**
- **Make custom slide presentations combining text, video, graphics and live web-cam images.**
- **Offer an interactive presentation solution with PI3000t**

Provide Safety Information

Show presentations and slide shows to impart safety information either on demand or at a specific location.

- **Timed safety presentations**
- **Announcements**
- **Pre-set emergency slide shows**
